

Modern Workplace as a Service MWaaS

Consolidate the procurement, provisioning, maintenance & management, security and support of your end users digital workplaces into a single but flexible service offering delivered through an OPEX commercial model.

Delivering a Modern Workplace for your users

OPEX commercial model removes large capex outlays required to refresh workplace devices

Full lifecycle Support

for procurement, provisioning, management and support

Increased Efficiency

Rapidly deploy workplace devices and speed up delivery of changes to meet your business needs or avail of new products and features

Managed Endpoints

Managed OS updates and antivirus compliance

Single Point of Support

Expert support staff managing all service and support components

Flexible Service

Telefónica Tech can manage as much of the workplace as you need, and support can be provided for multiple device types and operating systems

Adoption and Change Mgmt.

Telefónica Tech can develop and deliver custom training and material to drive staff adoption of new features within the Modern Workplace

Telefónica Tech MWaaS

The Telefónica Tech MWaaS service brings together all the key components and deliverables of provisioning, maintaining and managing a digital workplace to allow your business and staff fully realise your investment in end user IT.

The service offers flexible components ranging from device leasing through to providing reactive break fix support and full management of operating system updates and compliance management to ensure your estate is secure.

Charging is on a simple per device per month model, removing the need for large upfront investment to refresh your estate.

With terms of between 1 and 3 years, you can roadmap transformative projects to align with shorter refresh cycles and avoid delaying rollout of new services due to the need to sweat obsolete devices.

SERVICE DELIVERABLES

Through our Gartner-rated enablement framework, we'll work in partnership with you during each essential step. From getting started all the way through to support.
