Transform Legacy Systems

with App Modernisation

App Modernisation: Unlock Innovation and Growth

There's often a strong focus on the front end of customer applications, while architecture and infrastructure are neglected. This lack of investment in full application modernisation means organisations spend more time and money on maintaining workloads rather than driving transformation through automation, code hygiene, or performance improvements.

How We Can Help:

Our strategic cloud services drive innovation through comprehensive app modernisation. We help transform legacy systems into modern cloud architectures, reducing the time spent on maintenance. By leveraging cloud-native technologies, we free resources for business change, enabling new features, applications, and IT efficiencies through optimised performance and resource use. Modernised architecture integrates effortlessly with front-end systems, enhancing the overall customer experience.

Telefónica Tech

Microsoft Solutions Partner

Outcomes:

Modern Application Deployment:

We help organisations manage less, build faster, and innovate more by designing and building advanced cloud-native architectures.

Legacy Infrastructure Modernisation:

Refactor and rebuild outdated systems into modern solutions for easier operations and reduced management overhead.

Improved Operational Efficiency:

Enhance automation, code hygiene, and resource optimisation to boost IT efficiency in critical application.

Our Approach:

App Mod Blueprinting:

A collaborative whiteboarding session to explore potential modernisation patterns, components and processes tailored to your specific application.
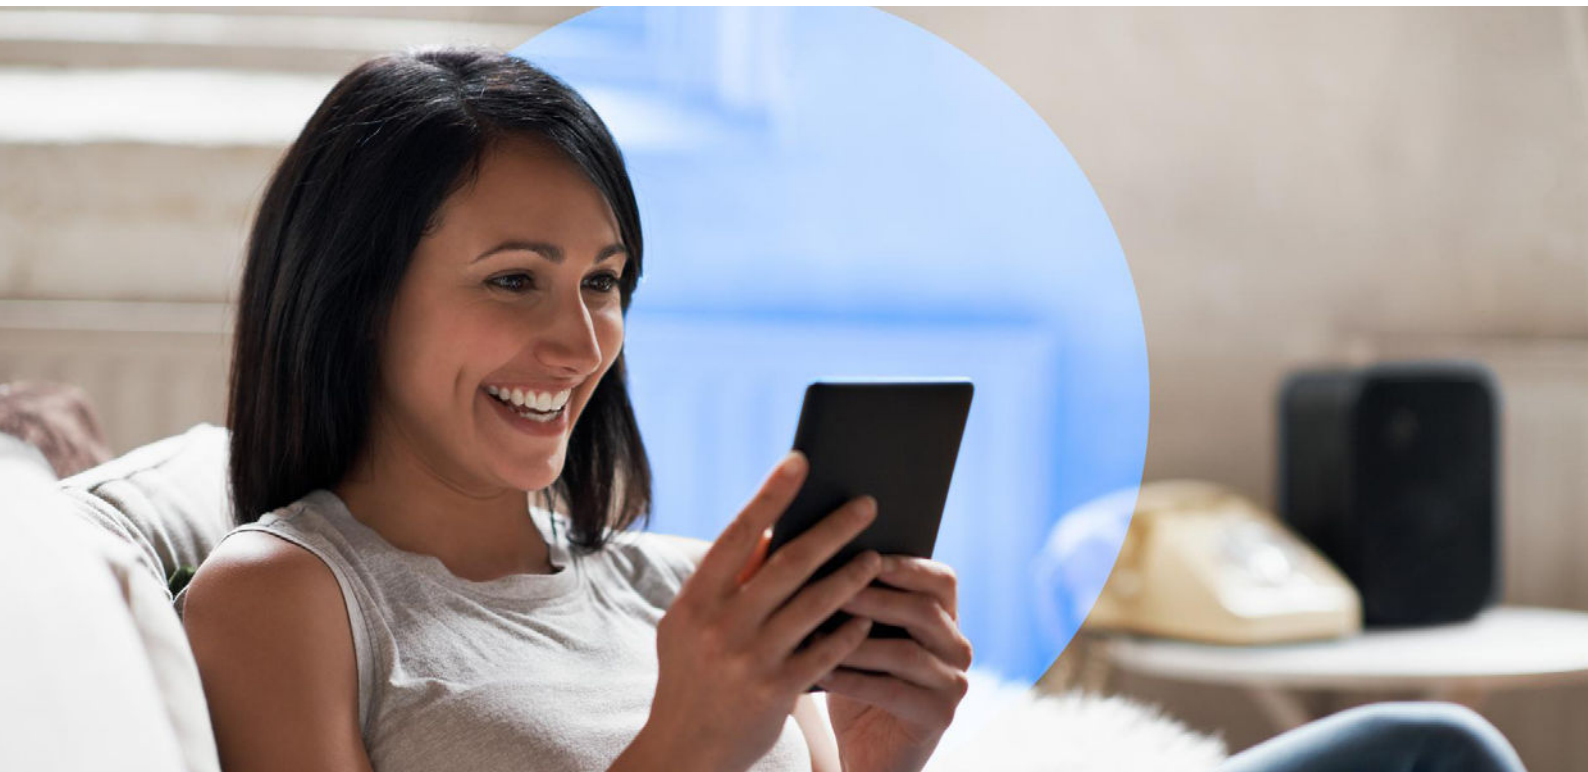

Build for Native Cloud:

We take an iterative approach to application modernisation, focusing on designing, building, and validating improved components or services to deliver the desired outcomes.

Modernisation Priorities:

A strategic assessment of your application landscape to identify and prioritise modernisation initiatives that accelerate application performance.

Why Telefónica Tech?

1 **Proven Framework**: Our agile approach ensures rapid modernisation and quick ROI.

2 **Industry Expertise**: We deliver tailored strategies, backed by deep sector knowledge.

4 **End-to-End Support**: We guide you from initial assessment to continuous optimisation.

3 **Cutting-Edge Tools**: We apply the latest AI and cloud-native technologies to future-proof your IT.
